

April 17, 2025

Doris Avenue Extension Preliminary Design Field Investigations

Contract Information: 24ECS-RD-01SP

Expected Start Date: April 21, 2025

Expected End Date: November 17, 2025

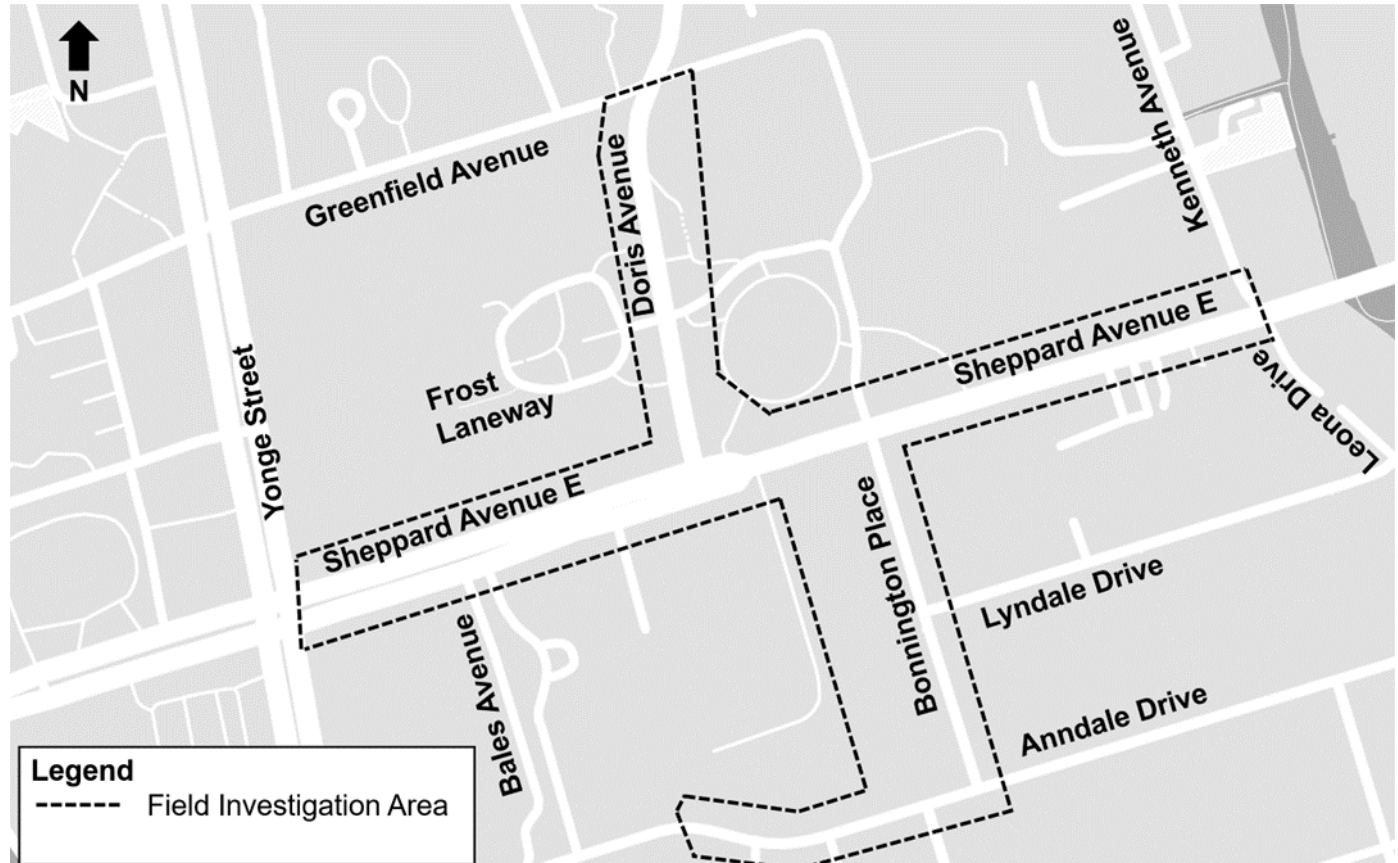

**Timeline is subject to change.*

The City of Toronto has completed the North York Centre South Service Road Municipal Class Environmental Assessment Addendum (EAA), which has evaluated options and proposed changes to Doris Avenue, Bonnington Place and Tradewind Avenue. The EAA recommends a new road to connect Doris Avenue and Tradewind Avenue south of Anndale Avenue.

The City has retained Parsons Inc. as the design consultants on the Doris Avenue Extension project, which would advance the work identified through the EAA. Before this design can be finalized, fieldwork by subconsultants will be completed to assess the current conditions of the project site in the work area shown in the map below. Construction is anticipated to begin as early as 2027.

More information on the design process and opportunities for public feedback provided through future notices.

MAP OF WORK AREA

WORK DETAILS

Site work crews will:

- Photograph site conditions.
- Complete a review of existing parking.
- Conduct cultural heritage assessments within roadways and boulevards.
- Assess the condition of trees within or close to the site and record the location and species.
- Gather soil samples from within the roadway and boulevard by drilling boreholes for geotechnical investigations. If necessary, a temporary piezometer (small pipe) will be installed within boreholes to allow for ongoing groundwater measurements. Any necessary piezometer will be protected with a cover, fencing or other means suitable for the location until it is removed.
- Conduct a subsurface utility engineering (SUE) survey to locate and record underground utility locations. Utilities will be marked with temporary paint and removable flags.

WHAT TO EXPECT DURING WORK

You may experience dust, noise and other inconveniences. The City will make efforts to reduce the impacts. We appreciate your patience.

	Work Hours: Site visits will typically occur Monday to Friday between the hours of 7 a.m. and 7 p.m.
	Traffic Management: Unloading and loading equipment may result in temporary disruption to local traffic. In order to complete the work effectively and in a safe manner, some pedestrian and vehicle traffic restrictions will be necessary.
	Restoration: The sampling areas will be restored when work is complete.
